Broadband Internet Now Available to Those With Line of Site to Deer Lake Mountain or 49° North at Chewelah Peak

Spokane, WA, December 4, 2006 – AIR-PIPE, a DbA of Wired or Wireless, Inc., recently completed a microwave radio connection from the Deer Lake Mountain tower to the top of Chewelah Peak at 49° North which provides broadband Internet to the surrounding areas. Builders, business owners, and home owners who have a clear view to one of the towers now have the ability to install a broadband Internet connection at their location.

AIR-PIPE is providing Internet connectivity, which includes a WIFI hotpot, for the ski resort's employees and guests. This new expansion of the AIR-PIPE network also brings a reliable, always-on broadband connection to subscribers in the surrounding areas.

Bill Geibel Jr., Owner and Senior Engineer of AIR-PIPE, lead the team that built the network which provides service to Stevens County. He is very excited about the completion of this expansion. Bill states, "This is the 18th tower we have added to the AIR-PIPE network and I am thrilled to expand into this area. We are pleased to offer this thriving region the next level of Internet connectivity."

About AIR-PIPE, LLC - Based in Spokane, AIR-PIPE is a locally owned and operated Internet service provider. AIR-PIPE caters to rural areas by using Motorola Canopy technology to transmit a radio-wave frequency from a tower in the area to a dish installed at a subscriber's location. Counties to which AIR-PIPE currently provide service include: Spokane, Stevens, Whitman, Bonner, Kootenai and Ponderay. Lincoln and Pend Oreille counties are the next prospective areas for expansion. If you would like more information please call (509) 892-2482.
