Building Tomorrow's Networks Today

WOW ™
WIRED OR WIRELESS, INC.
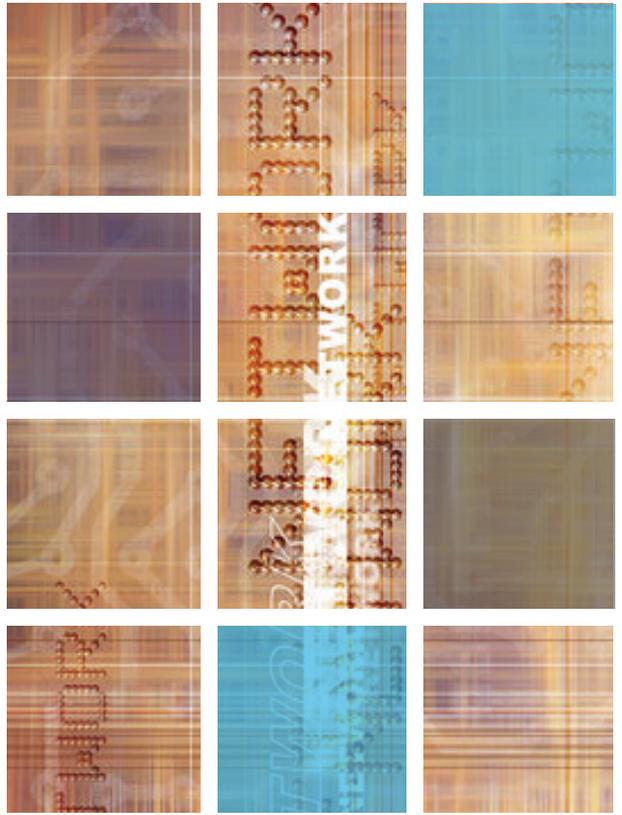

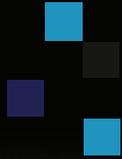

We Build Networks

How We WOW You...

Voice/Telephone Systems

Routing of voice conversation over an Internet connection is the latest in new technology. VoIP (Voice over Internet Protocol) provides a cost effective option for business and residential locations. Wired or Wireless has extensive experience installing sophisticated systems by 3Com and now Samsung IP telephony systems by utilizing a data link between the phone equipment and a PC or LAN. Wired or Wireless also has considerable experience installing wired phone system networks.

Audio/Video Systems

Wired or Wireless has the capability of installing premium home theaters systems quickly, efficiently and correctly. With the use of quality equipment from several well known companies like Harman/Kardon, Levition, Symphony Select, JBL, Proficient, Pioneer, and Denon, Wired or Wireless will provide you with the maximum experience you are looking for in an audio/video system.

CCTV and Security

Wired or Wireless will protect people and property with several lines of surveillance and CCTV products from companies like Honeywell, HAI, GE, Linear, and Visonic. With reliable equipment, competitive pricing and solid results, Wired or Wireless is able to provide superior solutions for any home or business.

Project Management

The Wired or Wireless's staff brings 40 plus years of experience in both local and regional areas. Project management will include expertise regarding LANs and WANs as well as Wireless Tower Systems. Wired or Wireless, Inc. was created to fill the growing need for a Systems Integrator that could provide expertise in networking that crossed the boundaries of both wired and wireless telecommunications networks.

Structured Cabling

Structured cabling is the lifeline for the entire information technology network and the core competency of Wired or Wireless. We design and build flexible cabling infrastructures that support multiple voice, data, video and multimedia systems. We are a one stop shop for all of your network infrastructure needs. With the use of high quality products and system design expertise, our customers have confidence in the longevity of their networks engineered by Wired or Wireless.

Wireless Networks

Wired or Wireless offers an all-encompassing network design based on proven structured needs assessment methodology. Services include Point to Point links, LAN, WAN and WI-FI systems using exceptional products from manufacturers such as Motorola, Dragonwave and Orthogon. Wired or Wireless's team includes BICSI RCDD/LAN Specialists, Manufacturer Certified staff and consulting engineers.

Two-Way Radio

Wired or Wireless realizes the importance of superior communications in today's business and public-safety environment. We offer the finest wireless communications equipment at the most competitive pricing. Members of our team include some of the most qualified technicians in the area. Wired or Wireless is a premier two-way radio installer for Eastern Washington and Northern Idaho.

Fiber Optics

In recent years it has become apparent that fiber optics are steadily replacing copper wire as an appropriate method of communication signal transmission. Wired or Wireless will design, install, and provide maintenance for all your fiber optics needs. Wired or Wireless is able to build an entire network based on high data transfer between buildings, locations, and/or radios.

LAN/WAN

With extensive experience regarding Local Area Networks and Wide Area Networks, Wired or Wireless has the ability to design, build, implement, manage and integrate a system that meets your specific needs.
