Following this guide should successfully set up your email. If you still have issues, you may need to contact your phone provider or you device manufacturer, as these are general Android instructions and specific devices/apps may differ:

To set up the default Android email app for your AIR-PIPE (air-pipe.com), Wired or Wireless (wow-tel.net) or Moosebytes (moosebytes.net) email, from the drop down menu along the top, select the "gear" symbol on the top right (or you can bring up your App folder and choose "Settings"):

Your settings menu should come up:

💭 📾 🐘 👔 1 🖾 🎖 📶 1 E 47 AM
🔅 Settings
Accounts
🙂 Dropbox
e Email
Facebook
8 Google
C Microsoft Exchange ActiveS
Skype*
🔀 Twitter
TouMail

Scroll down and chose "Add Account":

1 2 3 1 11:47 AM
🧔 Settings
Marker Twitter
💷 YouMail
🕀 Add account
System
Motion
Accessory
🕙 Date and time
🖐 Accessibility
1 Developer options
C Abaut daulas

Choose "Email":

Add your email address and password in the appropriate box. If you want this to be your default account, check the box alongside "Send email from this account by default":

🖳 📾 🌆 🤤 🔰 🖸 🍸 🔏 🔁 11:49 AM
< O Set up email
You can configure email for most accounts in a few steps.
support@air-pipe.com
Show password Send email from this account by default
Manual setup Next
qwertyuiop
asdfghjkl
🕇 z x c v b n m 🕶
123 Syn 🕄 🛄 . Done

Select "IMAP":

<	Add email account
	What type of account?
1	POP3 account
	IMAP account
	Microsoft Exchange ActiveSync

For servers, you will need to use mail.air-pipe.com Under "Security type", select "SSL" (this will protect your credentials with encryption):

🖳 📾 🐂 📾 👘 🖬 📅 🔏 🖬 TH-50 AM
< O Incoming server settings
support
Password
Sector
IMAP server
mail.air-pipe.com
Security type SSL
e e ! ! ? .
qwertyuiop
asdfghjkl
🕇 z x c v b n m 🕶
123 6ym 🔮 / 🛄 , .com Next

Scroll down the screen and it should look like this:

💭 📾 🐘 👳 🔢 🕅 🍞 🔏 🖬 TT-50 AM
< O Incoming server settings
Security type
SSL
Port
993
IMAP path prefix
Optional
Next
• @ 1 1 7 .
qwertyuiop
asdfghjkl
🕇 z x c v b n m 🕶
123 🗿 / 🛄com Next

Select "Next". For SMTP server we again use mail.air-pipe.com Scrolling down, you should see this (make sure "Require sign-in" is checked):

🖳 📾 🐂 📖 😑 👘 🛯 🖉 🔏 🖬 TTI-51. AM
< O Outgoing server settings
SMTP server
mail air-pipe.com
Security type
None
Port
